

TURF/COMMERCIAL MODEL 325EF

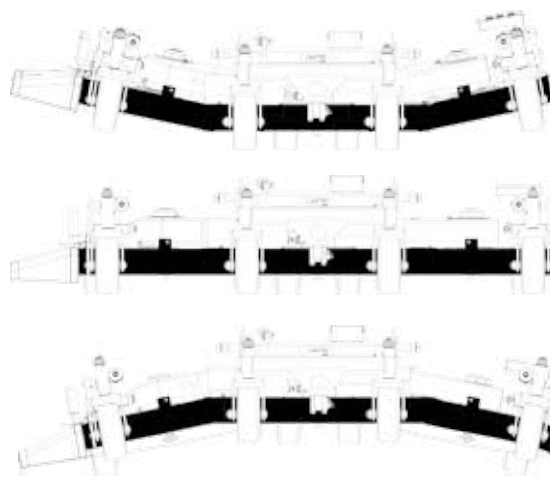

LASTEC®

Manufacturer of the
World's Only High-Definition
Articulating Mowers

The Accuracy of a Lastec Articulator built to fit your existing fixed deck out-front mower

The Model 325EF is a 72" wide fully articulating rotary deck that is offered with specially engineered kits to be mounted on 6 major brands of out-front mowers. The 325EF allows your existing out-front mower to handle the toughest terrain. Each 325EF features three 25" independent decks that follow the contours of the ground to deliver the cut quality of 3 small push mowers. The 325EF is a perfect replacement deck for any drive unit that has outlived the original fixed deck. It is also routinely preferred by many as a deck of choice when purchasing a new drive unit. The 325EF is a light weight accurate option that delivers a superior cut quality to most major brands of out-front rotaries.
