

TURF/COMMERCIAL MODEL 721XF

**LASTEC®**

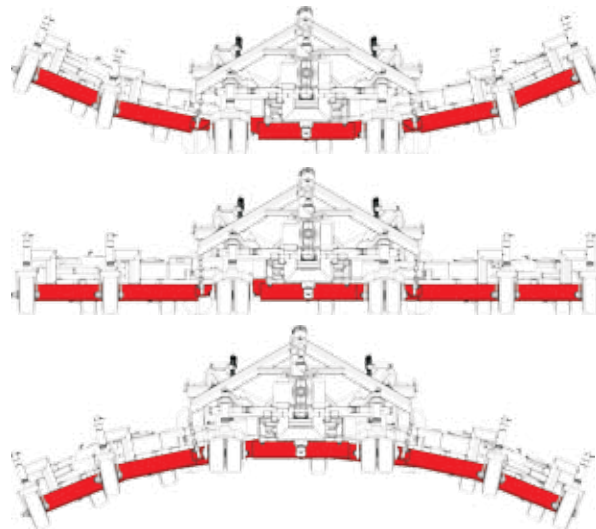

Manufacturer of the  
World's Only High-Definition  
Articulating Mowers

## The Original PTO Driven 721XR Is Now Available Where You Have Wanted It... Out Front for Greater Visibility

The 721XR was the first articulating mower ever offered to the turf industry in 1990 and is still arguably the finest and most accurate wide-area grooming mower in the world. If this 132" mower ever lacked anything, it was the ability to attach it to the front of a tractor for greater visibility. That changes with the introduction of the 721XF...a seven deck grooming mower that utilizes the smallest and most accurate articulating decks (21") to deliver a cut so accurate that a whole new term describes it...

High Definition Mowing.
